1. "The Pakistan government has decided to constitute a Power Development Corporation invested with powers to put the electricity department on a sound commercial basis. The installed power capacity in Pakistan has risen from 71,458 KW at the time of partition to 174,911 KW. But power development has not kept pace with requirements and expectations because of the pre-occupation with irrigation problems, lack of trained technical personnel and the dependence on foreign suppliers for essential machinery.
2. "The government of Pakistan introduced an export incentive scheme which will remain effective till March 31, 1955. The object is to boost exports of those primary and manufactured articles which have not yet been exported in larger quantities. The scheme will facilitate imports of consumer goods which are in short supply at present as exporters of the specified goods will get import licenses up to 30% of their earnings of foreign exchange.
3. "A Pakistani Cotton Delegation visited the UK and discussed with the Lancashire trade ways of increasing Lancashire's purchases of Pakistani raw cotton and Pakistan's import of Lancashire-made textiles. Since 1949 Japan has been the biggest supplier of cotton piecegoods to Pakistan."
